

Anton Bilchik, MD, PhD, MBA, FACS

Minimally Invasive & Cancer Surgeon, Researcher, Innovator

RESEARCH AREAS OF SPECIAL INTEREST:

- Minimally invasive surgery
- Value-Based Care
- Personalized Cancer Care (molecular and immunologic profiling)
- Microbiome and its role in cancer
- Quality outcomes in cancer surgery
- Physiology of circulating gastrointestinal regulatory peptides
- Radioimmunoassay of peptides in pathophysiological conditions
- Role of cholecystikinin in the control of growth and regulation of the pancreas
- Pathophysiology of an endocrine tumor-peptic ulcer model
- Oncogene expression and amplification in carcinoid tumors
- Molecular and physiological regulation of small bowel absorption
- Molecular profiling of gastrointestinal malignancies
- Immunotherapy of gastrointestinal malignancies

RESEARCH AND CLINICAL TRIAL COOPERATIVE GROUPS:

- **1999-2001** Invited Participant/Co-Investigator, American College of Surgeons Oncology Group Lymph node mapping and sentinel lymph node biopsy for stage I, II, III colon Cancer
- **Co-Founder**, International Consortium of Research (INCORE) of the Theodor-Billroth-Academy (TBA)
- **Member**, United States Military Cancer Institute

RESEARCH GRANTS:

AFFILIATIONS & OFFICE LOCATION

AWARDS & ACHIEVEMENTS
